Investment Rationale

Experienced, Vision-Led Founding Team

Driven by first-generation entrepreneurs with deep expertise in solar manufacturing and project execution, combining technical know-how with strategic market insight.

End-to-End Execution Model

Complete solar project lifecycle coverage from design and engineering to installation, O&M, and client support, offering a true one-stop energy solution.

Capacity Expansion and High-Growth Plans

The Company operates a 75 MW module plant and is scaling capacity to 375 MW by December 2025, followed by 600 MW by Q1 FY27. Further expansion includes a 1.2 GW fully automated solar cell manufacturing line, positioning the Company as a leading integrated player with strong long-term growth visibility.

Diversified Revenue Streams

Dual engines of growth high-efficiency solar PV module manufacturing and turnkey EPC projects, ensuring both scale and financial stability.

Valuation and IPO plan

The Company is raising INR 15.0 Cr at a post-money valuation of INR 75.0 Cr, implying a trailing P/E multiple of 10.7x. Corporate Professionals have been appointed as advisors for the planned Mainboard IPO in FY'27.

Executive Summary

- Founded in 2016 and headquartered in Sonipat (Haryana), HVR Solar (or "Company") is a manufacturer of solar panels and provider of EPC services for commercial purposes
    - **Manufacturing:** The Company currently operates at a capacity of **75 MW** and will scale it up to **375 MW by Dec'25** through the ongoing investment round
    - **Services:** The Company has successfully installed **over 7.0 MW** of rooftop solar systems for commercial, institutional, and public sector clients. In addition, the Company has established a dedicated EPC subsidiary, **HVR Photonics Pvt. Ltd., Noida (U.P.)**, which is projected to generate **INR 50 Cr in revenue** which is about 20MW
- The Company is well-positioned for sustained growth, leveraging strong execution capabilities
    - Skilled workforce of **76 employees on Payroll** and **72 on contractual basis**,
    - Robust **INR 180 Cr** order book for module manufacturing vertical, and
    - State-of-the-art **2,000 sq. mtr.** facility with scalable capacity, complemented by a **30,000 sq. mtr.** facility under development in Sonipat to house the proposed capacity expansion
- The Company is raising **INR 15 Cr** through this Pre-IPO round to part-finance a INR 28 Cr investment in a 300 MW facility for high-efficiency solar modules (>500W)
    - **Use of Funds:** Procurement and commissioning of machinery (partly ordered)

This capacity expansion positions the Company to scale production, adopt advanced technology, and meet the rising demand for next-generation solar modules

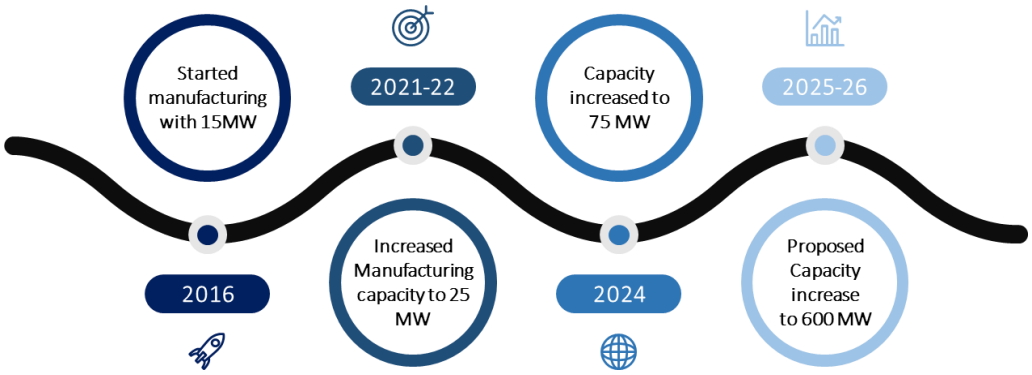
HVR's Journey



Key Achievements

Commercial and Industrial Solutions

Installed a capacity total of 3.5 MW of Rooftop Installations

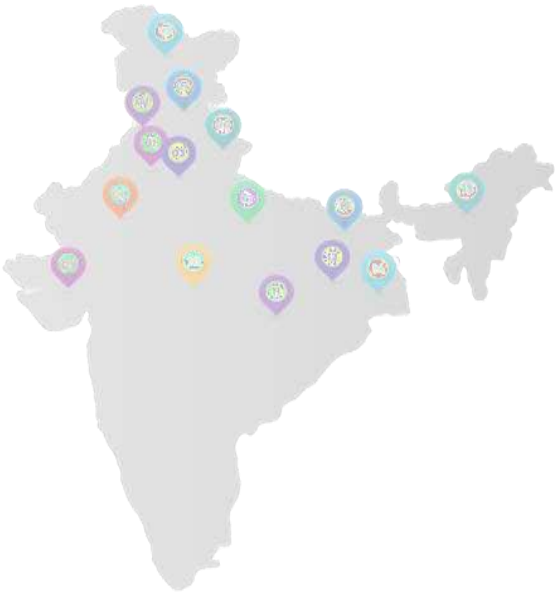
National Education Infrastructure Project

Installation of Solar Integrated street lights across 178 Jawahar Navodaya Vidyalaya School throughout India

Smart City Initiative

Flagship government sector project involves a substantial 2MW solar rooftop installation in Shillong, contributing to the city's smart infrastructure development Program

Extensive National Footprint



Category Wise Bifurcation *(In INR Cr)*

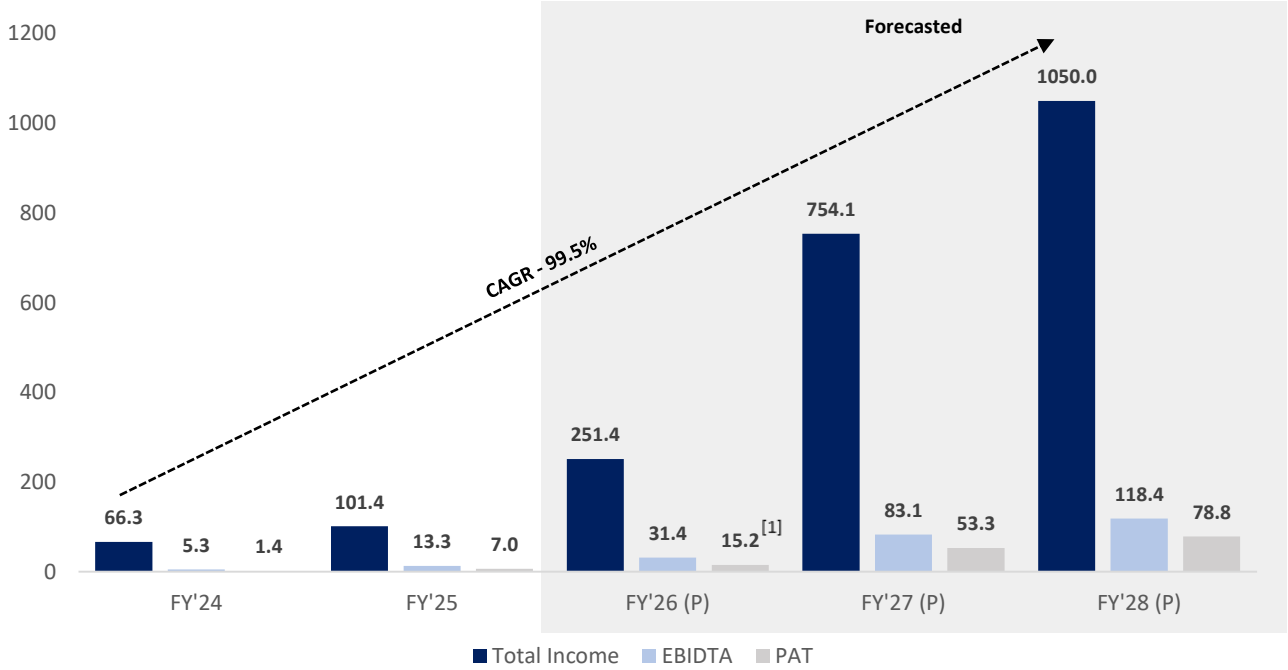
Financial Projections *(In INR Cr)*



Leadership Team

Rishabh Aggarwal
Managing Director

A first-generation entrepreneur with deep expertise in solar technology, Rishabh drives the company's strategic growth, manufacturing operations, and expansion roadmap.

Sagar Sachdev
Executive Director

Brings strong cross- functional experience in finance, operations, and EPC execution, playing a key role in scaling capacity and driving organizational performance.

Capital Structure

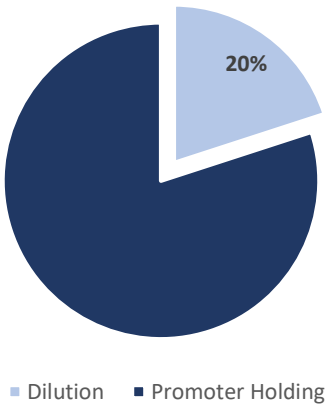
[1]- Using a conservative estimate

Fund Raising:
Pre-IPO Round (Sep'25)



Particulars	Pre IPO *(INR)*
Fundraise	15.0 Cr
PAT (FY'25)	7.0 Cr
P/E Multiple (Trailing FY'25)	10.7x
Post Money Valuation	75.0 Cr
% Dilution	20.0%

The Company is raising **INR 15 Cr through this Pre-IPO round** to support its capacity expansion plans. The funds will be deployed towards setting up a **300 MW advanced manufacturing facility** for high-efficiency solar modules (>500W).

- **Project Size:** INR 28 Cr, to be financed through a combination of Pre-IPO equity proceeds and complementary debt
- **Deployment:** Primarily for procurement and commissioning of machinery; part of the equipment has already been ordered
- **Timeline:** Facility expected to be operational by **Dec'25**

This expansion marks a strategic milestone, positioning the Company to capture growing demand for next-generation solar modules while enhancing scale, efficiency, and competitiveness.

IPO Round

The Company is targeting a mainboard IPO in the second half of FY27, with an expected valuation of **over INR 1,000 Cr**. The proposed issue will primarily fund the establishment of a fully automated **1.2 GW solar cell manufacturing line**, marking the next phase of its growth journey.

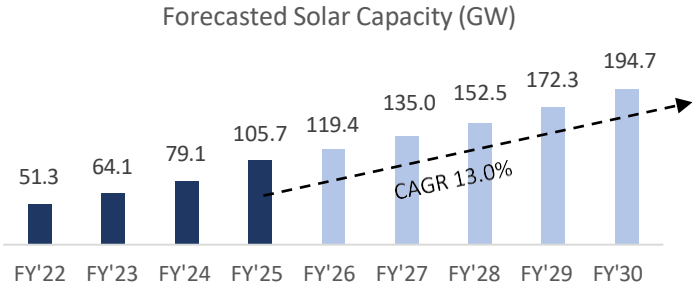
Annexure: Sector Analysis - Renewable Energy

- India's renewable energy capacity is expanding at a strong CAGR of 17.0%, progressing steadily toward its FY'30 target of 500 GW non-fossil fuel capacity, with 228.0 GW already achieved by Q1 of CY'25.
- In Q1 FY'25, India witnessed highest quarterly investment of USD 9.8 Bn in renewable energy, compared to USD 1.3 Bn in Q1 FY'24 (7.7x YoY)[1]
- In the first quarter of FY'25, India added 13.5 GW of new power capacity, with renewable energy accounting for 78.9%, underscoring the country's accelerating transition toward clean energy.
- Solar and wind power were the main contributors to this growth, accounting for 46.3% and 21.9%, respectively, of the total non fossil capacity

Source	Total Capacity (Mar'25)	Addition in Q1 CY'25
Solar	105.7 GW	7.8 GW
Wind	50.0 GW	1.9 GW
Others [2]	72.3 GW	0.9 GW
Total Non-Fossil Fuel	**228.0 GW**	**~10.6 GW**

Solar Energy

- Solar energy remained the dominant contributor to India's renewable energy growth, accounting for 46.3% of the total installed renewable energy capacity. It is expected to grow at a CAGR of 13.0% from 105.7 GW to 195.1 GW by FY'30



- India added 15.03 GW of solar capacity in FY'24, a 1.2x rise over FY'23, followed by a record 26.4 GW in FY'25
- Rajasthan, Gujarat, and Tamil Nadu emerged as the top-performing states, contributing 71% of India's total solar power

State	State-wise solar power potential (GW) [3]
Rajasthan	142.3
Jammu & Kashmir	111.1
Maharashtra	64.3
Madhya Pradesh	61.7
Andhra Pradesh	38.4
Gujarat	35.8
Himachal Pradesh	33.8
Odisha	25.8
Karnataka	24.7
Uttar Pradesh	22.8
Telangana	20.4
Chhattisgarh	18.3
Tamil Nadu	17.7
Uttarakhand	16.8
Assam	13.8

Industry Drivers

- **Favourable Tech:** Technological advancements and large-scale manufacturing have transformed the global solar industry, driving module prices down by over 90% in the past decade. This shift has also accelerated the adoption of advanced bifacial and monocrystalline modules, significantly improving both efficiency and affordability worldwide.
- **Geographical Advantage:** India receives around 300 sunny days each year. The country also benefits from high solar irradiance levels[4], averaging between 4 and 7 kWh per square meter per day across most regions
- **Benefits offered by the government:**

User Category	Monetary Benefit
Solar Module Manufacturer	INR 2.5–3.5 Cr/MW incentive (under PLI Scheme)
Residential User	Up to INR 78,000 subsidy + INR 18,000–24,000 annual savings (for a 5-6 kWh capacity)[5]
Business Owner	40% accelerated depreciation + bill savings
IPP/Utility Developer	INR 50 Lac–INR 1.2 Cr per MW VGF [6]

- **Peer Comparison**

FY'25 (in INR Cr)

Company	Revenue	EBITDA	PAT	EBITDA Margins	PAT Margins	P/E[7]	ROCE
Solex Energy	662.0	77.0	43.0	11.6%	6.5%	37.6	29.9%
Servotech Renewable Power	674.0	58.0	33.0	8.6%	4.9%	88.1	19.7%
Alpex Solar	780.0	127.0	83.0	16.3%	10.6%	25.3	51.8%
Solarium Green Energy	230.0	28.0	19.0	12.2%	8.3%	41.5	20.1%
Average	**586.5**	**72.5**	**44.5**	**12.2%**	**7.6%**	**48.1**	**30.4%**

Conclusion

India's bold ambition to achieve 500 GW of non-fossil fuel capacity by 2030 positions its solar sector at the forefront of the global clean energy transition. With an estimated USD 223 billion[8] needed in solar and wind investments to meet this goal, the market presents a vast and timely opportunity for investors. Solar energy has rapidly evolved into a mainstream, scalable asset class, driven by over 90% cost reductions, rising energy demand, and robust government support through PLI schemes, subsidies, and tax incentives. Strong adoption across utility-scale, commercial, and residential segments further reinforces the sector's readiness for sustained growth.

Notes:

Solar Industry in India - Size, Share & Industry Growth, Indian Renewable Energy Industry Analysis | IBEF

4 Solar irradiance is the power of sunlight received per unit area at a given location, measured in kilowatts or watts per square meter

5 Calculated from Waaree solar calculator for the state of Haryana, electricity bill 4000 @ INR 4 per kWh

6 VGF- Viability Gap Funding (VGF) is a financial support mechanism provided by the Government of India to make economically essential but financially unviable solar projects more attractive for developers

7 P/E multiples sourced from Screener.in (as on **08-09-2025**), calculated as **Market Cap / TTM PAT**.

8 Achieving 500 GW of RE capacity by 2030
